As a student currently enrolled in a BSc degree program in Computer Science and Information Technology from St. Lawrence College, I am enthusiastic about IT. With my love for technology, I maintain a close watch for trends in IT, and I never stop short of honing my skills. I look forward to contributing to projects, collaborating with others, and growing in such a field that is always busy and changing.

## EXPERIENCE

---

### Freelancer

I specialize in creating responsive, user-friendly, and visually appealing websites that meet client needs. My technical skill set includes a solid understanding of object-oriented programming (OOP) concepts and REST APIs, and I have a growing proficiency in various programming languages. I am also familiar with modern web development tools and frameworks, continuously learning to enhance my capabilities.

As a dedicated BSc Computer Science and Information Technology student, I actively bridge academic knowledge with real-world applications, focusing on problem-solving, efficient coding practices, and collaborative development. My passion for technology drives me to stay updated on industry trends, embrace challenges, and consistently push boundaries. A quick learner and highly motivated professional, I am eager to contribute my skills and ideas to innovative projects, adapt to dynamic environments, and grow in the ever-evolving IT field.

## EDUCATION

---

### BSc.CSIT

Kathmandu

*St Lawrence College*

Apr, 2022 - Present

*NAMI A-levels*

Jun, 2019 - Jul, 2021

## PROJECTS

---

### ABI Trade Link Pvt Ltd

I developed a fully responsive and functional e-commerce application using Laravel 11 to deliver a seamless user experience across various devices. This project incorporates key features such as product browsing, categorization, and management, providing a robust foundation for online shopping businesses. Leveraging REST APIs and Object-Oriented Programming (OOP) principles, I ensured clean, maintainable, and scalable code that can adapt to future business requirements. While a payment integration feature is not yet implemented, the platform is designed with scalability in mind, allowing for easy updates and modifications as business needs evolve. This project reflects my commitment to continuous learning and delivering practical, innovative solutions.

### Portfolio

This project is about an dynamic portfolio website built with HTML, CSS, and Javascript, which shows everything - projects and skills - in an organized, friendly, and easy-to-navigate way. Of course, this page can be really well designed and absolutely functional, but does not serve any back-end stuff for sending messages.

### Bus Ticketing System

I developed a fully functional Bus Ticketing System as part of a web development project. The system includes two main sections: a Bus Owner Counter for fleet management and a User Interface for booking and reservations. I implemented features that allow users to check real-time bus availability, reserve, and book tickets online. The Bus Owner Counter enables bus owners to manage bus schedules, seat availability, and other operational details. The platform ensures a seamless and secure experience for users, with reliable ticket booking and payment processing. This project demonstrates my ability to build user-centric, feature-rich web applications.

## Ecommerce

Built an e-commerce site using React and Next.js, featuring product listings, a shopping cart, and user authentication—managed data with MongoDB. I have used Cloudflare for improved performance.  
<https://github.com/kaflebiplob>

## Frontend-Next js

Developed a straightforward Next.js app featuring essential components such as navigation, dynamic pages, and API routes. Demonstrated foundational skills in server-side rendering, static site generation, and routing.

## ACHIEVEMENTS

---

### Volunetering

- Leo Club of Kathmandu Danfe (Social Media Manager).
- Group project frontend developer.

### Ability

- Strong problem-solving skills
- Ability to work well in a team
- Quick learner and good Listener

## SKILLS

---

Html5 & CSS, Javascript, laravel, Bootstrap, Java, ReactJS, Tailwind Css, Basic Wordpress Knowledge, Basic Knowledge of Nextjs

## LANGUAGE

---

Nepali, Hindi, English,
